

Skilled Technicians Provide Essential Services

By Universal Technical Institute

Universal Technical Institute graduates play a significant role in America's infrastructure and economic development. As the nation continues to deal with lingering COVID-19 pandemic and supply chain issues, skilled technicians are needed and are doing jobs essential to Americans' well-being and economic recovery.

This indispensable workforce includes graduates of Universal Technical Institute (NYSE: UTI), who service the vehicles, truck fleets, and machinery that fuel crucial industries, carry essential goods and supplies, and support vital infrastructure.

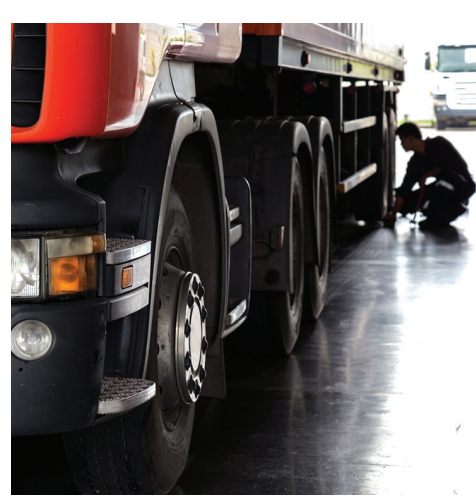

The US Department of Homeland Security's Cybersecurity and Infrastructure Security Agency "Memorandum on Identification of Essential Critical Infrastructure Workers During COVID-19 Response" lists the transportation industry and maintenance repair technicians as essential, and these skilled employees participate in every stage of the nation's supply chain.

Brandon Rubio is at the front of the supply funnel. The diesel engine specialist and UTI-Houston graduate maintains and repairs high-tech farm equipment, and helps the agricultural industry continue to operate. Near the beginning of the pandemic, he participated in an equipment repair project that kept a large citrus farm in business. As the food industry manages ongoing supply chain and production challenges, his work has been increasingly important.

"I feel like a doctor for vehicles who is critical to keeping our country operating during this time," Rubio said. "I'm extremely proud to be an essential worker and feel privileged to have a job."

During the pandemic, many delivery and truck drivers have also emerged as essential workers, with numerous healthcare providers referring to them as fellow first responders. In response, UTI-Exton graduate Dylan Bansi, a Peterbilt technician who services diesel vehicles and engines, has prioritized over-the-road trucks that transport hospital equipment, medication, food, and key consumer goods.

"It feels good knowing you're following your passion while helping the world right now," Bansi

says. "We're not only standing behind the Peterbilt brand, but we're helping out the ones in need the most." Just as crucial to the supply chain are the industrial loaders and forklifts that move goods and supplies on and off trucks, trains, ships, and loading
